DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 9-20 are the inclusion of the limitations of a printing method and an inkjet printer comprising the steps of establishing an equivalent color having a smaller amount of components than each of a plurality of requestable colors, and depositing a drop of ink for each component of a retrieved equivalent color to print the equivalent color in place of the requested color of a pixel. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Torpey et al. (6,290,330) teach a printing method comprising a step of maintaining black edge quality in liquid ink printing.

- Katakura et al. (6,827,423) teach an inkjet printer using different inks to be ejected allocated to different blocks of nozzles.
